

The rational water management and protection of our environment represent the essential basis of a sustainable development.

The resilient infrastructure concept is at the heart of our concerns, thus offering innovative solutions in terms of protection against natural risks.

We provide a wide range of services from water resource planning and management to full engineering of water facilities, drinking water and sanitation.

We ensure a unique expertise in the most advanced water treatment technologies, including seawater desalination and wastewater reuse.

## Our Missions

### Urban and Industrial Water

- Water supply master plan
- Water supply and distribution
- Drinking water treatment plants
- Water desalination and demineralization
- Storage tanks and water pumping stations

### Hydraulic equipment

- Dams and reservoirs
- Planning and management of water resources
- Development of flood protection systems
- Hydroelectric facilities
- Port facilities
- Underground structures
- Seawater intake structures
- Water supply and transfer

### Sanitation

- Water intakes and supply structures
- Irrigation water distribution networks
- Sewerage and drainage networks
- Track networks

### Urban planning

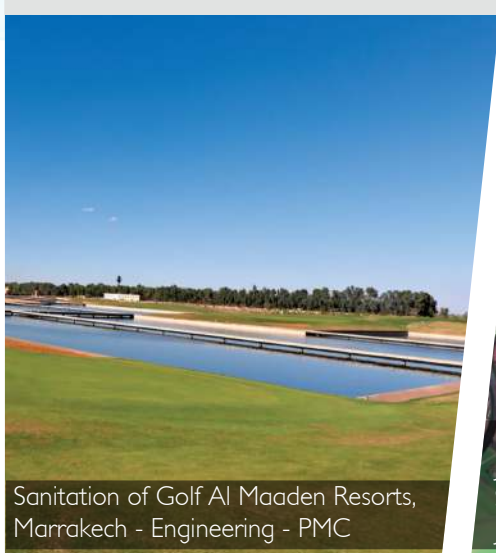

- New cities, housing, touristic and industrial areas
- Roads and main networks of subdivisions  
Condos (Roads, sanitation, drinking water, irrigation of green spaces, electricity and telecommunications)
- Roads and main networks of the industrial platforms

WATER

**JESA**

# Flagship Projects

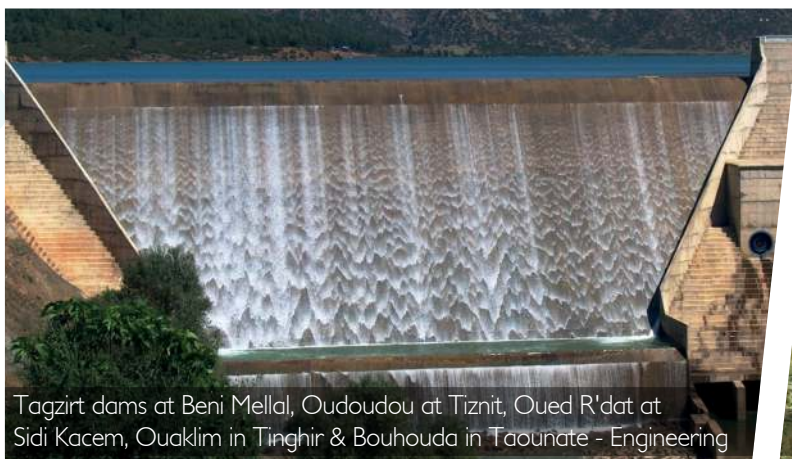

Sanitation of Golf Al Maaden Resorts,  
Marrakech - Engineering - PMC

Rehabilitation of the seawater canal,  
Jorf - Engineering - PMC  
Seawater desalination plant,  
Jorf Lasfar - PMC

Reinforcement of AEP, adduction & treatment  
of water, Zagora, Debdou, Attaouia - Engineering

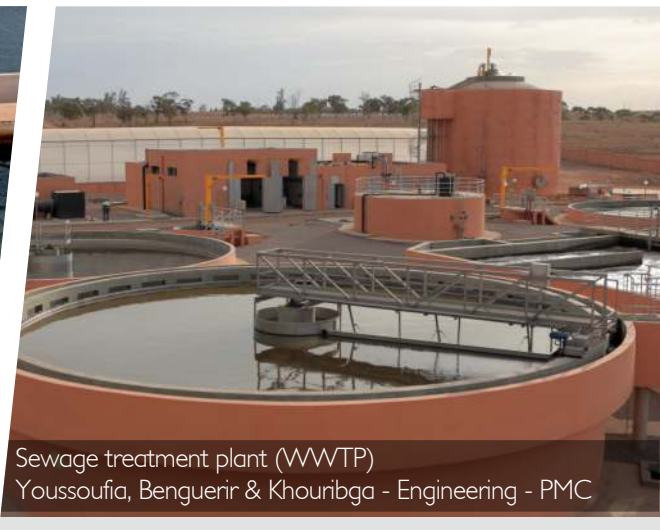

Tagzirt dams at Beni Mellal, Oudoudou at Tiznit, Oued R'dat at  
Sidi Kacem, Ouaklim in Tinghir & Bouhouda in Taounate - Engineering

Mohammed VI Green City, Benguerir - Engineering - WS

Drinking water supply of Agadir - Engineering - PMC

Sewage treatment plant (WWTP)  
Youssoufia, Benguerir & Khouribga - Engineering - PMC
